

# NUMBER FRUIT & VEGGIE Ninja

Slice the number fruit into smaller numbers. The smaller numbers should add up to the whole number in the fruit!  
How many addition problems can you make for each one?

**Teacher Instructions:** Write a number inside or over each fruit/veggie. The child should break the number down into 2 smaller numbers which add up to the whole number in the fruit/veggie. This is to practice visualizing numbers in parts and wholes. It helps to add and subtract more quickly without using fingers to count simple numbers or having to practice flash cards. For example: The number 10 can be sliced into 5&5, 6&4, 7&3, 8&2 and 9&1.
